¹ UN/LOCODE shows the ISO 3166 alpha-2 Country Code that is followed by a space

and a 3-character code for the place name: XX XXX. The 3-character code element for the location name will normally comprise three letters. However, where all permutations available for a country have been exhausted, the numerals 2-9 may also be used. A code element added to a new version of the code list may be preceded by a plus sign (+); a letter X (X) means that the code element will be removed from the next version of UN/LOCODE and a vertical bar (|) indicates a change in the location entry.

Annex R List of all UK sea ports with UN LOCODES

² names of those locations that have been accepted for inclusion in UN/LOCODE.

³ the ISO 1-3 character alphabetic and/or numeric code for the administrative division of the country concerned (state, province, department, etc.), as included in International Standard ISO 3166-2/1998.

⁴ indicates the status of the entry by a 2-character code e.g. whether approved by Government, by Customs, or based on a user requirement not necessarily recognised by

an authority, etc. It is also intended to show the status of checking, e.g. that function indicators are not verified. The following codes are used at present:

AA = Approved by competent national government agency

AC = Approved by Customs Authority

AF = Approved by national facilitation body

AI = Code adopted by international organisation (IATA or ECLAC)

AM = Approved by the UN/LOCODE Maintenance Agency

AS = Approved by national standardisation body

AQ = Entry approved, functions not verified

RL = Recognised location - Existence and representation of location name confirmed by check against nominated gazetteer or other reference work

RN = Request from credible national sources for locations in their own country

RQ = Request under consideration

RR = Request rejected

QQ = Original entry not verified since date indicated

UR = Entry included on user's request; not officially approved

XX = Entry that will be removed from the next issue of UN/LOCODE

⁵ year and month of request, of entry into the code list, of latest approval, etc., as relevant.
