

Methodology

All papers related to the estimation techniques that could be used in an assessment of the wider economic benefits. This includes the departments 2005 discussion paper, a subsequent paper to assess the usability issues and other papers on the development of guidance. This section is designed specifically for scheme promoters and appraisers who want to keep track of the development of the guidance.

Usability Review of DfTâs 2005 WEBs Discussion Paper

The paper reports the findings of a review of the DfTâs 2005 document on an approach to appraising Wider Economic Benefits. The review was undertaken for DfT to inform the development of the forthcoming Wider Economic Benefits appraisal guidance.
