

Regional strategy

Draft guidance to regions on delivering a sustainable transport system

This draft guidance to regions focuses on the work that regions will be invited to undertake to influence the Government's decisions on transport investment from 2014 onwards. It accompanies the documents "Delivering a sustainable transport system" and "Delivering a sustainable transport system: consultation document on planning for 2014 and beyond", published in November 2008.

Regional funding allocations

Details of the system under which funding allocations are made to the English regions covering certain aspects of transport, housing and economic development.

Growth areas in the Thames Gateway

A single view of the enabling transport schemes in the Thames Gateway and information on DfT transport investment within the Thames Gateway Growth Area.

Transport policy

Information on the Department for Transport's policy development process, including a review of the Commission for Integrated Transport and the white paper: A new deal for transport.

Regional Spatial Strategies: Guide to Producing Regional Transport Strategies

The guide is intended as a practical tool for Regional Assemblies, Regional Development Agencies, Government Offices and other organisations involved in the process of producing regional transport strategies.
