

Viewing and printing working drawings for traffic sign design

The working drawings for traffic sign design and manufacture are being made available as PDF files for downloading and printing. These are A4 sheets that can be printed from Adobe Acrobat Reader. If you are using version 4, the "Fit to page" box should be left unchecked. If you are using version 5, the "Shrink oversized pages" box should be left unchecked. Also in version 5, you may find that checking the "Smooth Line Art" box in "Preferences" enhances the screen image.
