## Introduction to International comparisons

---

This EU annual pocketbook is available on line and gives a range of transport statistics for EU member states: infrastructure; vehicle stock; transport mode for passengers and freight; transport safety

### **International comparisons are also include in DfT publications:**

- Transport Statistics Great Britain
- - General Statistics (population, area, GDP)
  - Passenger transport
  - Freight moved by mode
  - Road and Rail infrastructure
  - Road deaths
  - Road traffic
  - Road vehicle stock
  - Petrol and diesel prices
  - Principal Trading fleets
  - Outputs of airlines
- Focus on Freight

### **There are several international organisations that produce specialised volumes of statistics including**

- International Union of Railways
- International Road Federation
- The International Union of Public Transport has compiled a *Millennium Cities Database* of key transport indicators for 100 cities worldwide.
- The United Nations Economic Commission for Europe maintains an up to date list of links to organisations producing transport statistics.

**For related documents, pages and internet links, see the column on the right.**
