

WARNING NOTICE TO ALL CUSTOMERS

It is part of the conditions of the Approval for Approved Tachograph Centres that they are required to report, to VOSA, details of any vehicle that is submitted for tachograph work on which the Tachograph system has been interfered with. This interference would include such items as the fitment of unauthorised devices, or where the system is showing the signs of tampering.

Failure to report such items will result in disciplinary action being taken against the Approved Tachograph Centre. This action could lead to the withdrawal of this centres approval.

VOSA needs your help in maintaining the reputation of the Tachograph calibration scheme and road safety.

If you have any information, contact VOSA on

0300 123 9000

All calls and information will be treated in the strictest confidence.
