

HGV inspection standards and procedures

Who should attend

This course is invaluable for those responsible for the maintenance and preparation of vehicles for annual testing.

Benefits

As a result of attending these courses, past delegates have found that by employing a more systematic approach to inspecting their vehicles they have maximised their chances of detecting defects that may otherwise have attracted a failure at annual test.

Additionally, categorising defects according to the inspection manual criteria may result in a significant reduction in both cost and down time associated with vehicle preparation.

5 Day course content

- Testable items inspected at the annual test
- Pass / fail criteria
- Assessment of component wear
- Inspection procedures
- Safe and correct operation of testing equipment
- Brake performance testing
- Practical application of pass / fail criteria
- Individual assessment of course members
- Feedback and coaching
- Practical exercises in vehicle inspection

3 Day course content

- Testable items inspected at the annual test
- Pass / fail criteria
- Assessment of component wear
- Inspection procedures
- Safe and correct operation of testing equipment
- Brake performance testing
