

IM 9.1 LIGHTING/SIGNALING (Obligatory) - Issue date 07/11/2008

Procedure and Standards **item 2, NOTE 3** (page 2) gives guidance on the **brightness of lamps**.

In P&S 2 please replace **NOTE 3** with the following text:-

NOTE 3: The **brightness of lamps** bearing an appropriate approval mark as given in Annex 1 defines the acceptable standard. Lamps not bearing such a mark should emit light of similar brightness.

The **maximum** permitted intensity of a European Approved high level stop lamp is below the **minimum** intensity required for a rear fog lamp and therefore a high level stop lamp will not be suitable for use as a rear fog lamp.
