

Attention! New items in Annual Test!

As of April 2005 two new items will be included in the inspection procedure at annual test: Shipping container twistlocks and vehicle mounted stabiliser legs.

Twistlocks

Which vehicles are affected?

This inspection applies to all vehicles and trailers constructed or adapted to carry removable shipping containers, whether a container is mounted or not.

What will be checked?

The presence and condition of the twistlocks and secondary locking devices will be checked.

As vehicles and trailers will have various combinations of twistlock mounting facilities the check will apply to matched pairs along the length of the vehicle or trailer.

Lorry Mounted Crane Stabiliser Legs

Which vehicles are affected?

This inspection applies to all vehicles and trailers fitted with stabiliser legs.

What will be checked?

The security of the stabiliser legs will be checked, along with the presence and security of any locking devices designed to prevent the stabiliser leg from sliding out when the vehicle is in motion.
